

# SITIBSA Selects INPHO

SITIBSA, Serveis d'Informació Territorial de les Illes Balears (Spain), with their headquarters in Palma de Mallorca, have recently acquired the whole INPHO production line to fulfil their needs in terms of aerial triangulation, automatic DTM generation, DTM data editing, DTM interpolation and derived products, ortho-rectification and mosaicking. The delivery also includes two Summit Evolution stereo workstations for digital mapping.

The contract negotiations and system delivery was done by GTBiberica S.L., Madrid (Spain), INPHO's distributor in the Iberian and Latin American sales regions, after winning a tender that was published in September 2005.
