

SkyTech 2016 UAS Event Presents Programme

After the success of the first SkyTech event in April 2015, the organisers are launching SkyTech 2016, organised in collaboration with SUAS Global, RUSTA and Flightpath Consulting. SkyTech 2016 dedicated to advancing the global commercial UAS industry. The event is more than doubling in size and will feature 70 exhibitors, 50 speakers and over 3000 attendees. The event is scheduled to take place on 27 and 28 January 2016 at the Business Design Centre, London, UK.

SkyTech 2016 will provide information, connections and marketing solutions through a tradeshow, conferences, workshops, product launches, live demonstrations and networking events. SkyTech is also a media platform and press day for the UAV industry across the UK, Europe and worldwide.

SkyTech will be attended by experts from across the UAV industry, bringing together manufacturers, suppliers, service providers, government, academia, investors, trade associations and regulatory bodies. SkyTech will also bring together buyers from a range of targeted industries including agriculture, environment, oil & gas, infrastructure, utilities, construction & property, policing, fire service, search & rescue, media, broadcasting and mining.

Exhibition

SkyTech's exhibition is completely free to attend and will feature the latest technology and services from across the global unmanned aviation industry. Alongside its exhibition SkyTech will also feature a number of conferences and break-out workshop sessions providing information tailored to all aspects of the commercial UAV industry.

Workshops

SkyTech's breakout workshops are free to attend, interactive sessions giving the delegates everything they need to know about UAVs; regulation & safety, meet with qualification providers and discover the next steps for incorporating UAVs into the business.

The Survey Industry Conference

SkyTech will also feature a two day conference dedicated to the rapidly expanding UAV survey industry. This conference will showcase the range of survey applications suited to UAV technology through a combination of academic, industry and end user led case study sessions. Day one will focus upon innovative uses for UAVs within the fields of agriculture and the environment, whilst day two will consider the role of UAVs for the oil & gas, mining, utilities, infrastructure and construction industries.

UAS Industry Conference

SkyTech's main conference will accommodate 500 delegates. Over the course of two days senior level speakers will present on matters of regulation, safety, investment, funding support, insurance, data protection, privacy and liability across the UK and globally. Industry leaders will showcase next generation technology and services through dedicated product launch sessions, whilst leading academics will provide the latest updates on industry research.

Applications Conference

SkyTech's applications conference will take place on the second day of the event. Manufacturers, solution providers and end users will present the latest advances and applications for UAVs within the fields of policing, search and rescue, fire service, security, real estate, media and broadcasting.

[Conference tickets with early-bird discount](#) are available online.
