

# Snowflake Software Announces GeoXchange

The 2008 Snowflake Software Conference to be held from 23 -24 April 2008, at the Dynamic Earth in Edinburgh, United Kingdom, will focus on the requirements of the industry to make its data available, thereby complying with the demands of regional and international legislation.

With local, central, regional and national governments under pressure to make their data available (accurately and in real-time), Snowflake is offering the chance to learn from the experts.

Confirmed speakers include representatives from:

- Centre for Geospatial Science, University of Nottingham
- European Commission DG JRC
- The Scottish Government
- Grontmij NL
- Alterra NL
- grit GmbH

With topics ranging from:

- INSPIRE
- Data harvesting
- Implementing a Spatial Data Infrastructure (SDI)
- Geospatial Web Services
- CityGML for 3D modelling
- Neogeography
- And many more...

The two-day conference will provide an open forum for commercial and technical discussions and consider the pro's and con's around the data sharing phenomenon.

Registration is now open.
