

StreetMapper USA Conference

3D Laser Mapping and IGI have announced the first-ever StreetMapper USA User Conference. The event is to be organised in conjunction with partners GeoDigital and Terrametrix and will take place on 10th February 2011 at the Astor Crowne Plaza in New Orleans. It thus follows on directly from the world's premier Lidar event the International Lidar Mapping Forum (ILMF), which is being held on the 7-9th February at the same venue.

Designed to attract both existing and potential users of mobile mapping systems the StreetMapper USA User Conference will feature a range of presentations including keynotes and technical presentations from 3D Laser Mapping and IGI and user papers from around the world. The conference will also provide the perfect opportunity for

delegates to meet with laser scanning specialists and network with mobile mapping professionals from around the world.

For further information or to express an interest in attending the StreetMapper International User Conference please email info@3dlasermapping.com, or call 00 1 402 618 3165. Attendance is strictly by invitation only and registration is essential.
