

# SuperGeo Becomes Motorola Strategic Partner

SuperGeo Technologies has entered into a collaboration with Motorola Solutions. SuperGeo will be marketing Motorola ET1, the industrial-grade and Android-powered tablet in Taiwan. In this business partnership, Tatung System Technologies Inc., the primarily authorised agent of Enterprise Mobility Solutions in Taiwan, will cooperate with SuperGeo to enhance the local sales.

To assist Motorola Solutions in achieving the distribution and introducing the industrial-grade and Android-powered tablet ET1, to a variety of industries in Taiwan, Tatung System Technologies joins forces with SuperGeo to release the mobile GIS solutions for field mapping applications. Featuring IP54 standard, MIL-810G certification, high durability, waterproof and shockproof advantages, Motorola Solutions ET1 is designed to

endure bumps, supporting stable computing in enterprise environments and maximum productive efficiency of mobile GIS software.

Covering both Windows Mobile and Android operation platforms, SuperGeo's mobile GIS solutions can be deployed on various mobile devices to assist surveyors in performing spatial data collection and measurement with ease, and further enhancing data accuracy and reliability. SuperGeo offers comprehensive mobile GIS software for Android OS including SuperSurv 3, SuperGIS Mobile Tour, and Mobile Cadastral GIS. Enterprise users can deploy rugged Motorola Solutions ET1 during outdoor survey, for better manipulation.

The company also continually engages in GIS research projects and innovations to provide customers with customisable or ready-to-use GIS solutions. The collaboration with Motorola Solutions and Tatung System Technologies aims to bring ideal mobile GIS solutions for more users. The three-party alliance hopes to satisfy the demands of mobile applications in each business and consequently create a win-win situation for the industry.
