

# SuperGeo Provides Reseller Training in Taiwan

SuperGeo Technologies invited its Malaysia Axis Commerce to the headquarters in Taipei (Taiwan) for the training programme of new products. Since the upcoming SuperGIS 3 series, new products are upgraded and enhanced significantly, SuperGeo Training and Support Center organised a complete training programme for the partners.

Having been the exclusive reseller of SuperGeo's for a long time, Axis Commerce has marketed SuperGIS series products excellently in Malaysia. The top Universities in Malaysia, as well as several important Government institutes, even including the Prime Minister Department, are all using SuperGIS software.

Axis Commerce valued the training course very much. Not only the Directors of Engineering Department and Sales Department, but also the CEO, joined in the training and meeting. Several business issues, the success experience in Taiwan, and further collaboration opportunity have been discussed and are under processing now.
