

Supergeo Renews Partnership Agreement with Géo.RM in France

Supergeo Technologies, a leading global provider of complete GIS software and solutions, announced to extend partnership with Géo.RM to cooperatively promote SuperGIS software and solutions in French-speaking countries. This collaboration would encourage greater use of SuperGIS software and solutions in France and further break into new markets in Europe

Established in 1991 and based in Poitiers, France, Géo.RM is the professional system integrator which specialises in offering custom GPS and GIS mapping solutions, and the consulting service to fulfill the growing needs of field mapping.

SuperGIS mobile GIS software such as the newest SuperSurv and SuperPad support iOS, Android, and Windows Mobile powered devices, helping users develop flexible GIS applications to improve field operations, increase accuracy of data collection, and therefore assist organisations with better decision-making.

Through extending partnership with Géo.RM, it allows Supergeo to promote SuperGIS solutions to French-speaking users. Supergeo commits to continuous product innovations and service improvement in order to support Géo.RM in finding and even creating new business opportunities.
