

Supergeo to Bring Latest GIS solutions at Intergeo

Supergeo Technologies, the global leading GIS software and solution provider, will be showcasing the latest SuperGIS solutions at Intergeo. During this event, Supergeo will bring the newest product features of SuperGIS total solutions, which include newly updated SuperGIS Server 3.2 and SuperSurv 3.2, mobile GIS app for iOS and Android.

The company will also firstly announce a task-oriented GIS app, Forest Inventory App, to show foresters a new solution of timber cruising with smart tech.

By taking the opportunity, Supergeo is going to hold a partner event, to share the product roadmap, highlight future technology trend, and exchange more market tendencies. The emerging GIS vendor expects to provide robust and economical GIS solutions for more international GIS experts at the important show.

For more information about SuperGIS total solutions [see here](#) or visit stand no. A3.033.
