Survey-verified Neighbourhood Maps in India

Leptonmaps from India has launched Locality+, the best available neighbourhood map data of major Indian cities and towns. The data on the map are validated through extensive ground surveys.

Locality+ is available as:

- Locality: point/boundary on map consisting of locality, city and state name. Available for all major cities/towns
- Sub-locality: point/boundary on map consisting of sub–locality, locality, city and state name. Available for all major cities/towns
- Block: point/boundary on map consisting of block, sub-locality, locality, city and state name. Available for all metropolitan areas.

All variants are available as point or boundary. All the variants are priced per city/town.
