

# Tele Atlas Expands Southern Europe Digital Map Coverage

Tele Atlas (Netherlands) has expanded its digital map coverage in southern Europe, including near 100% coverage of Greece, Malta, Italy, Spain and Portugal, and broadened coverage of new regions to the east including Bulgaria and Turkey.

This expanded European coverage is part of Tele Atlas' ongoing global expansion strategy, and in response to increased demand from global customers for highly detailed and accurate maps of all major countries. The company currently offers coverage in more than 200 countries and territories worldwide and will continue its expansion efforts to meet the needs of partners and travelers around the globe.

Updated digital maps and content for Greece, Malta, Italy, Spain, Portugal, Bulgaria and Turkey are available for Tele Atlas partner application developers and device manufacturers in the personal navigation, automotive, Internet and wireless markets with the latest release of Tele Atlas MultiNet and Tele Atlas MultiNav databases.
