

# Tele Atlas Extends Asia Pacific Coverage

Tele Atlas (Singapore) has made available its integrated digital maps of Southeast Asian countries. The updated Tele Atlas MultiNet database includes comprehensive maps of Malaysia, Singapore and Thailand and more than 200,000 points of interest (POIs) to help personal navigation system and mobile phone users easily find places and services such as restaurants and cinemas, as well as pharmacies, dentists, doctors and car rental facilities.

MultiNet Southeast Asia features include:

- Navigable street network data in Malaysia for the major cities of Seremban, Melaka and Pinang. Additionally, the major road network coverage has been increased to cover more than 65% of the population, and index areas have been included for the first time to improve addressing and geocoding
- Updated street network data in Singapore with new and realigned geometry in the Changi and Hougang areas and house numbers for the entire country
- Navigable street network data and newly incorporated index areas for Bangkok, covering nearly 10 percent of the population of Thailand. In addition, street network data is now available for more than half of the total population, and the interconnecting street network is complete for the entire country.
