Topcon FC-2200

Topcon has released its new alphanumeric field controller, the Topcon FC-2200. With a full keyboard, colour, sunlight readable, touch screen, built-in wireless connectivity, five mega pixel camera, and special bar code scanner, the FC-2200 is a powerful alphanumeric controller. Main features include Windows CE-based architecture and an optional communication pack for robotic radio control or cellular communication.

Other features include a built-in wireless Bluetooth, Wi-Fi and WLAN connectivity, a USB flash drive adapter, and RS-3 radio. Additionally, the FC-2200 has the full range of TopSURV 7 modules from which to choose, for Total Station, Robotics and GPS-control.
