

Topcon Introduces FC-2000

Topcon (CA, USA) announces the availability of a new field computer - the FC-2000. It features a 400 MHz Intel X-scale processor, Windows CE.NET operating system, and built-in 128 MB RAM. The FC-2000, combined with Topcon's TopSURV field controller software, provides seamless integration of data from total stations to robotics to RTK GPS systems.

The FC-200 has a full-colour display and an expanded keyboard. Wireless communication with GPS and optical systems can be added by with the insertion of an optional Bluetooth card.

The FC-2000 is designed with a rugged housing and waterproof port / compartment covers.
