

# Topcon releases TopField

Topcon Europe Positioning (The Netherlands) has released Top Field, a new data collection software for their total stations. TopField can be used as an alternative to the standard software on-board Topcon GTS-100N, GTS-230N and GPT-3000N/LN series total stations.

TopField on-board software is designed to meet the basic needs of a contractor or site surveyor, and holds the following features:

- Handles multiple job files
- Resection Routine available as a setup option
- Set-out routine, including option to collect the point after staking
- Topo collection, with fast, auto-measurement option and angle measurement offsets
- Create coordinates from an offset point from a known reference line, or from taped measurements
- Upload and download coordinates using Topcon Link or Topcon Tools software.
