

TopoDOT Gains Momentum

Caltrans, West Virginia and Ohio, USA, have recently joined seven other U.S. state transportation departments (DOTs) using TopoDOT for processing Lidar data from tripod, mobile and airborne systems.

Other state transportation departments using TopoDOT include Alabama, Arkansas, Florida, Iowa, Michigan, Virginia and Wisconsin. Certainty 3D was pleased to add New South Wales Roads and Maritime Services as the latest Australian agency to use TopoDOT. Other foreign agencies using TopoDOT include Manitoba Infrastructure and Transportation department in Canada and Queensland Department of Transport in Australia.
