

TopoSys North America Opens Denver Office

TopoSys GmbH (Germany) has founded a subsidiary to strengthen its position in the North American Lidar market. As of February 2007, TopoSys North America, Inc. has established its North American headquarters in Denver, Colo., a major hub in the world-wide geospatial industry, to serve as a sales and support center to meet the ever increasing demand for TopoSys Lidar systems in the region.

TopoSys North America Inc. is managed by Roman Kathofer, a Geomatics engineer and photogrammetrist with several years experience in photogrammetric mapping and airborne sensing operations.

Roland Mangold joins TopoSys North America Inc. as director of business development. For the past two years, he was the organizer of the International Lidar Mapping Forum (ILMF) and business development manager at Spectrum Mapping, LLC. Previous to that, Mr. Mangold was the founder and publisher of Earth Observation Magazine. He has 17 years sales, marketing and communications experience in the geospatial industry.
