

TopoSys Receives ISO 9001:2000 Certification

TopoSys (Germany) has established a certified Quality Management System according to DIN EN ISO 9001:2000. The certificate covers all business fields of TopoSys, including sensor production and Lidar service projects.

The certificate is available for download at the website in the open download section.

TopoSys has introduced a complete line of Lidar sensor systems, engineered to address the increasing applications for aerial Lidar, from precise wide-area topographic mapping to high-density corridor mapping. The TopoSys LIDAR sensor family consists of three systems: The Falcon III, Harrier 56/G3, and Harrier 24.
