

# Trident-3D Analyst Software- Version 3.3

A new version of Trident-3D Analyst data extraction software, version 3.3, has been released by Geo-3D Inc. (Canada). Trident-3D Analyst is a soft-copy photogrammetric tool for the analysis of digital images captured with horizontally oriented camera systems.

The new version includes the following features:

- 3D GIS viewer based on openGL
- improved OTF Calibration tool (possibility of using control points)
- support for Oracle ODBC linked layers.
