Trimble International User Conference

Trimble (CA, USA) will hold its International User Conference, â€˜Trimble Dimensions 2005â€™, at the Mirage Hotel in Las Vegas from 23rd to 26th October 2005. The theme will be â€˜Move Your Business Forwardâ€™, with an emphasis on improving productivity and lowering costs. The conference scope will include the complete suite of Trimble products for construction, survey, engineering and infrastructure. These include products from MENSI, Tripod Data Systems (TDS) and Applanix. Other Trimble partnering technology providers will also participate in the conference to extend its range of products and applications. With more than a hundred sessions planned, the conference will feature a range of programmes. In application sessions users will explain the practical aspects of these technologies. Users are invited to present papers and give project updates. To present a paper at the conference, authors should be a user of a Trimble product and must submit a short abstract on the topic or theme by 29th April 2005. Details about registration and paper presentation are available at the companyâ€™s website.
