

United Remote Sensing Technology Microsoft Reseller

United Remote Sensing Technology (United RST, China) has been selected by Imagemaps, Microsoft partner for Asia Pacific and the Indian subcontinent, as a reseller for UltraCam photogrammetric products in the Chinese market. United RST is part of a large family of companies, including CATIC Siwei, China Siwei, AVIC International Holding (HK) and China Aerospace and Science Corporation (CASC), all involved in aerospace, surveying and mapping throughout China.

The decision to transfer the responsibility for the sales territory to United RST is driven by plans to reach a higher level of business development and to expand market reach. Future investment in Microsoft technology is also a major goal that will be pursued with the parent companies of United RST.
