

Upgrade for TopSURV Field Software

Topcon Positioning Systems (CA, USA) has released a new version of TopSURV field software, which offers new enhancements.

The version 6.11 of TopSURV includes:

- Windows Mobile 5 operating system
- Support for both the PanAM and Anik WAAS satellites
- L2C s/n has been added to view the new modernized GPS signal
- Support for new G24 internal GSM modem in the GR-3 GNSS receiver
- Support for new DSP Digital internal and external UHF radio systems
- Enhanced GMS-2 field controller wireless total station support
- Additional digital level sensors are now added
- OEM or user customizable splash screen
- Clip/Ispol formats
- Enhanced landXML file function
- Import/Export of road alignment files between jobs
- Enhanced user interface for edit/selection of multiple road alignments, profiles and cross section sets
- Cross section viewer has been added
- Overview map with image for design pt, current pt and toggle between stakeout plot view and map view

The new TopSURV 6.11 is now available for free download as an upgrade for Topcon field controller users.
