

USA Street Map Dataset at Simple GIS

Simple GIS has released tj SimpleUSA Street Map dataset and project. This is a free dataset provided by Simple GIS and is compiled from OpenStreetMap data as well as data from the US Census Bureau. It also includes a Simple GIS routing and geocode database built from the OpenStreetMap data and US Census data. Of the client, Simple GIS 9.5 has been released

The SimpleUSAProject file is a pre-configured Simple GIS Client project file enabling users to use the geocoding and routing data within this dataset. The dataset can be downloaded from the <u>Free GIS Resources</u> page.
