

Viva v4.0 for Viva Total Station and Viva GNSS

Leica Geosystems has presented version 4.0 of its Leica SmartWorx Viva onboard software to be available in November 2011. This new version is packed with new features to make data collection and stakeout even simpler and even more productive.

The new features in SmartWorx Viva v4.0 include: Leica Exchange; 3D data overlay; improved remote viewing of the TS wide angle camera with CTR16/RH16 radios; panoramic image capture; improved lock at short distances; extensions to pop-up menus and drawing toolbar; the ability to use GS08 and GS12 GNSS sensors as RTK base stations and more.
