

Workshop on remote Sensing and Environmental Hazard

TeleGIS Laboratory (Italy) has announced the Workshop on Remote Sensing and Environmental Hazard taking place in Cagliari, Italy from 7th to 8th July 2005.

The conference is organised by TeleGIS Laboratory-CINSA (University of Cagliari), EAF (Sardinian Office for Flumendosa Water Management), AIT (Italian Association of Remote Sensing).

This conference intends to promote scientific and technical exchange between Italian specialist working at the interface of remote sensing, environmental hazards and its human implications. It is targeted to application community and government. Thus, both an overview of the current state of art as well as operational opportunities will be presented. This is especially important to initiate a transfer of expertise from scientific community to local government offices interested in applying these techniques.
