

CHCNAV | Alpha3D Mobile Mapping Solution

CHCNAV's Alpha3D brings to geospatial professionals a premium high-performance, vehicle-independent mobile mapping solution to capture mass data in continuously changing environments. It enables them to get their work done faster and more accurately in order to increase project productivity.

The Alpha3D combines state-of-the-art high-performance hardware, including a long-range, ultra-high-speed, precise laser scanner, high-resolution HDR panoramic camera in combination with advanced GNSS receiver and high-precision IMU. Extremely compact, lightweight and rugged, the Alpha3D is one of the most innovative mobile mapping systems on the market today.
