

# Webinar: Introducing the New 9 axis IMU RTK Hi-Target V200

**Are you expecting a GNSS receiver with less weight but higher productivity?**

By innovating the technology, Hi-Target has designed a new-generation compact GNSS receiver V200. It is also the latest 9-axis IMU RTK, which will make a greater contribution to land survey. In this webinar, our senior product manager Lance Lan gave a detailed introduction of the Hi-Target V200 from the following aspects:

- V200 Appearance Characteristics
- Internal Configuration
- New Features in Hi-Survey Road Software

**Speaker: Lance Lan**

Senior Product Manager of Hi-Target International
